

What will be charged for shipping your order?

Costs are based on the weight of your order. This is the most accurate and fair way to calculate shipping. To find out what the shipping costs for your order will be follow these steps:

1. How much does your total order weigh?
Use the table on this page.
2. To which shipping zone does your destination country belong?
Use the table on one of the next two pages.
3. Check the Shipping zone table on the next page. See in which weight categorie your order falls to find out the shipping costs.

We aim to keep shipping costs as low as possible for our customers and always pay a part of them for you. Keep in mind that parcels including fenders can be quite big and heavy which increases shipping costs.

- Please note that bracelets are shipped free worldwide.
- Shipping within the Netherlands is free.
